

## SCHLING'S MIDGET HOME GARDEN WATERMELON

● Home gardeners who have never considered or attempted the growing of Watermelon in latitudes north of Philadelphia to the Canadian border now have available this new development originated in New Hampshire that will produce lovely miniature true Watermelon fruits in Mid-August and later from June 1st sowing.

● Compare the size of the fruit with the hand that is holding it and you have a picture of the all around beauty and size of the Melon. The skin is paper thin, the flesh is all meat, and the flavor compares with the highest quality sweet Melons you have ever eaten.

● Place your order now for yourself and your friends.

PRICE: 50¢ packet, 5 pkts. \$2.25

No. ....
